

RUB CLEAN GEL WITH GRIT

- ✓ Effectively dissolves grease and oil
- ✓ Easily rinses or wipes off
- ✓ Non-Irritating
- ✓ Very low odour
- ✓ Protects hands and assists in the control of dermatitis

WATERLESS INDUSTRIAL HAND CLEANING GEL

Cyndan Rub Clean Gel With Grit removes grease and oil aggressively without being irritating to the skin.

Rub Clean Gel With Grit has been formulated to dissolve the heaviest grease and grime whilst being gentle to the hands.

The key to this balance is the low percentage of petroleum solvent which reduces the drying effects on hands and the residual odour.

No unpleasant solvent type odour remains when hands are cleaned with Rub Clean Gel With Grit.

Lanolin boosted Rub Clean Gel With Grit is gentle to the skin but rough on the soils.

To achieve an excellent clean, carefully selected emulsifying agents are introduced to breakdown the soiling.

Rub Clean Gel With Grit is not just another hand cleaner. The results are outstanding. Hands can be rinsed off with water, or wiped clean with a dry rag.

The Rub Clean Gel With Grit contains super-fine four micron beads which assist in the removal of things such as paint and two-pack epoxy.
