

ENVIRO DRYSORB

Absorbs:

- ✓ Oil Spills
- ✓ Paints
- ✓ Petrol
- ✓ Chemicals
- ✓ Battery Acids
- ✓ Body Fluids

PREMIUM OIL ABSORPTION FLOOR SWEEP

Cyndan Enviro Dryorb is designed for the absorption of liquid spills on hard surfaces including workshop floors and roadways.

Enviro Dryorb is made from a natural renewable source. It is non-toxic and is safe to animals, humans and the environment. It is made up from a recycled, cellulose based waste material, which has been treated to reduce dusting, making it simple, easy and pleasant to use.

Cyndan Enviro Dryorb will absorb many times its own weight and is beneficial for use on all spills such as oil, paint, petrol, chemicals, vomit, blood, urine and other pollutants. It encapsulates the pollutant thus easing the pressure on water quality in our environment.

Available in bulk, transport spill kits, spill kit stations and in biodegradable cotton socking of various lengths for use in a variety of applications.

Enviro Dryorb has been independently tested, and passes the US EPA Paint Filter Test 9095A for disposal of used hydrocarbon absorbent materials to landfill. The water resistant formulation allows it to absorb oil from water, whilst floating on the surface.

USES INCLUDE:

- Petrol Stations
- Leaky machinery
- Workshop Floors
- Roadways
- Traffic accidents
- Waterways
