

BOLT FREE

- ✓ Lubricates
- ✓ Frees Nuts & Bolts
- ✓ Dissolves Rust & Corrosion
- ✓ Residual Protection
- ✓ No bolt too difficult to remove guaranteed

FREES NUTS AND BOLTS

Cyndan Bolt Free is a penetrating and lubricating agent.

Bolt Free contains a special oxygenated hydrocarbon compound which offers a superior penetration and lubrication of the oil into rusted and heat bound nuts and bolts. This allows Bolt Free to move up the bolt thread thus freeing nuts, bolts and fittings within minutes.

It dissolves rust and corrosion instantly. It's reduced evaporation rate allows for better penetration and contains DuPont™ Teflon® for long residual protection.

Bolt Free is a highly concentrated chemical formulation preventing damage to hardware and fittings during removal of rusted and heat bound nuts, bolts and fittings.

Available in a convenient 400gm aerosol.

All Cyndan Aerosols are CFC free.

SIZE:

400g CAN

IDEAL FOR:

- Rusted & heat bound
- Nuts
- Bolts
- Fittings
