

POWER SOLVE

- ✓ Biodegradable & Non - flammable industrial grade solvent
- ✓ Removes grease, carbon, inks, oil & creosote from all surfaces
- ✓ Leaves no film or residue
- ✓ Cuts down cleaning time
- ✓ Odour free product

BIODEGRADABLE INDUSTRIAL GRADE SOLVENT

Cyndan Power Solve is a totally biodegradeable, nonflammable, industrial grade solvent. No film or residue is left when used, thus cutting down on valuable cleaning time. Removes grease, carbon, inks, oil and creosote from all surfaces.

Power Solve is a water soluble industrial solvent. Due to material safety concerns, Power Solve has been formulated without the commonly used ethylene glycol monobutyl ether (2-Butoxyethanol).

Power Solve is the same composition as Cyndan Power Kleen but without 2-Butoxyethanol. The advantage of the omission of this chemical provides for an odour free product and has some benefits in certain industries in relation to workplace Health and Safety requirements.

The recommended average strength is 1 part Power Solve to 15 parts water. May be used stronger or weaker as required. Simply mop, spray or wipe the surface to be cleaned and allow a couple of minutes penetration, then rinse off with water.

Suitable for use in AQIS inspected meat and food processing plants.

SIZE:

1L, 5L, 25L, 205L

IDEAL FOR:

- Heavy industrial applications
- Floor wash on concrete
- Machinery cleaner
- Truck wash
