STAINLESS STEEL SENTRY (BULK)

For all grades of marine and architectural, internal and external Stainless Steel.

Cyndan* Stainless Steel Sentry is the second step to the conditioning and ultimate protection of your Stainless Steel. The Cyndan* NANOLON concentrate when applied to the preconditioned Stainless Steel microscopically coats it and protects it for several months depending on the conditions.

The Cyndan* NANOLON concentrate protects stainless steel from atmospheric corrosion which causes unsightly "tea staining" and rusting. This product is designed to be used only in conjunction with Cyndan* Stainless Steel Rejuvenating Paste.

DIRECTIONS:

Once the contaminants have been removed from the stainless steel surface liberally spray the Cyndan* Stainless Steel Sentry over the entire area to be protected. Using a rag wipe over the area removing excess Cyndan* Stainless Steel Sentry.

SAFETY: Avoid contact with eyes.

FIRST AID: If swallowed, do NOT induce vomiting, give a glass of water and seek medical attention. Contact the Poisons Information Centre (13 11 26 Australia; 0800 764 766 New Zealand). If in eyes, hold eyelids open and flush with water for at least 15 minutes.
