

**C.R. Laurence of Australia Pty Ltd.**

CR Laurence Australia is an extremely reputable manufacturer of high end architectural products for the glass & metal industries in Australia. The final finish of our installed products in conjunction with ongoing maintenance for our customers is critical to our success. We researched extensively into products that would not only value add to our range of hardware but also provide longevity to the aesthetics of both hardware and the glass itself.

We found Cyndan a complete solution for our business with products like Vitroglaze and Stainless Steel Sentry. These products enable our reputation to be upheld for the life of the product after installation.

Thank-you Andrew for your excellent service and knowledge sharing enabling us to compete with an edge in our extremely competitive industry. I thoroughly recommend the use of Vitroglaze on all newly installed glass and stainless steel Sentry for all our metal hardware, whether it be stainless, brass or other precious metals. Our customers love your products and most of all it helps us to maintain excellence after our hardware is installed.

Kind Regards,

Nathan Ungaro
