Performance Review – Client Testimonial Cyndan - Foaming Sanitiser

Since using Cyndan our labour, chemical usage and associated costs have reduced significantly.

Our typical end of day procedures entailed about 45 mins of labour time to apply chemical, scrub down, hose off and apply a sanitiser to our stainless benches, cutting boards, floors and walls.

Since using **Cyndan Foaming Sanitiser** our labour has reduced significantly to about 25mins, (makes for happy staff) since the product cleans very well and we do not need to scrub everything, also **this one chemical does both the cleaning and the sanitising.**

Our chemical costs, handling and drum disposal has **reduced significantly** from using 1 x 25lt drum per week down to approx 1 x 25lt drum per 5 – 6 weeks.

We are happy to recommend Cyndan.

Yours Sincerely

PAUL BARBARA
