Attention: Danny Hamilton

Dear Danny,

For years our customers and specifiers have been asking Interspace to provide a complete service including an ongoing maintenance program on our projects and your products help us to competently and confidently meet their needs.

The use of stainless steel and glass has been steadily increasing over the last 10 years in the building industry and our customers are coming to understand the need for these products to be serviced. We have gained the skills and knowledge in what to use to maintain these surfaces and most importantly, how to do it properly.

Interspace manufacture and supply many products from domestic to industrial and the support we require is not only for a good product, but back up service for our customers to get the correct information on these products.

As the trend is moving more towards a complete customer care solution ranging from design, specification, lifespan and maintenance, there is a lot of pressure on everybody in the industry to provide a complete package.

When we were introduced to Cyndan from one of our suppliers Metaglo, we found a company with products that not only work, but are also willing to find the right product for each application. We were so impressed that we have taken on a lot of your products and using them in our maintenance program and we will be marketing this program extensively.

We are looking forward to a long and beneficial working relationship together.

Thank you, Cyndan

Jorgen Hansen
