Dear Robert

Cyndan Micro Inviso Shield

As requested I am happy to comment on the use of Cyndan Micro Inviso Shield on the Port Macquarie Hastings Councils public paved areas.

We commenced a trial of the product in August of 2001. Since then we have been so pleased with the results that we have progressively purchased and applied the product. The applications took place over several months, as Council's budget would permit.

Our last application was in October 2002. We have not as yet completed all the areas we want to do, as we can not pre-clean the areas due to water restrictions.

The areas we have treated are vast and consist of concrete, pavers and tiles of different types and pebble crete.

The reduction in the cleaning of these surfaces is excellent. I must add however, that the ability of the Micro Inviso Shield to repel chewing gum on the pebble crete is not as effective as the other surfaces, however the overall result is what we were expecting, and we are very happy with the outcome.

Yours sincerely

Steve Robb
